

WHAT IS UNIVERSAL DESIGN?

It's design that's usable by all people, to the greatest extent possible, without the need for adaptation or specialized design. People often think it's just for individuals with disabilities, but that's a misconception. By considering the diverse needs and abilities of all throughout the design process, universal design creates products, services and environments that meet peoples' needs.

PRIMARY DESIGN CONSIDERATIONS

1. Way finding
2. Maneuvering
3. Adaptability
4. Low physical effort
5. Choice
6. Connection to nature, daylighting and views
7. Warm tones
